

Moose Specific Information

Definitions

- Antlered Bull - any moose having an antler or antlers of at least four inches in length measured from the top of the skull.
- Antlerless - a female or juvenile male with an antler or antlers less than four inches in length measured from the top of the skull. FWP suggests hunters not take a moose with a calf at side.
- Either sex - any moose.

Licenses and General Information

- An applicant who receives a moose license is not eligible to apply for or receive another license for moose for the next succeeding 7 years (see 7 Year Wait chart).
- License holders may legally take one moose subject to all specifications on the license issued.
- Hunters harvesting a moose must leave evidence of sex naturally attached to the carcass.

Moose License Auction

- Legislation authorizes the Fish & Wildlife Commission to provide for the auction of one moose license each year. This license authorizes the hunter to take an antlered bull moose in any open district of his/her choice. If this license holder is successful, the moose will not be counted against the district quota. License holders may hunt only in areas open to moose hunting.
- The auction is held annually during the winter by a conservation organization that is preselected by the F&W Commission.
- Hunting is authorized for the next hunting season, not the current year's hunting season.
- Money raised through the license auction is used for management of moose.

Moose HD Regulations

Residents are eligible to apply for any of the following licenses. Nonresidents are restricted to certain districts. Nonresidents are limited to, but not guaranteed 10 percent of a region's quota. **Districts where nonresidents may apply are listed on the moose, bighorn sheep and mountain goat nonresident application, but may change when final quotas are set in July.**
